

NISHANTH R

Bengaluru, Karnataka | 7026371009 | nishanthr2713@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Aspiring AI Engineer with a 9.2 CGPA, specializing in Generative AI, LLMs, and Deep Learning. Experienced in building Transformer-based systems, multi-agent pipelines, and NLP applications using PyTorch and Python. Hands-on with text, image, and generative model architectures including GANs, Diffusion Models, and LLaMA/GPT-style models. Proven ability to cut data processing latency by 50% through pipeline automation. Strong communicator and team leader eager to contribute to production-grade AI at Ronin Labs.

EDUCATION

B.E. Computer Science — Sai Vidya Institute of Technology, Bengaluru

2023–2027 | CGPA: 9.2

Pre-University (Class XII) — Seshadripuram PU College, Bengaluru

2021–2023 | 95%

TECHNICAL SKILLS

AI Frameworks: PyTorch, TensorFlow, Keras, Scikit-Learn, Hugging Face Transformers

Generative AI & NLP: LLMs (GPT, LLaMA), DALL·E, Stable Diffusion, GANs, Transformers, Diffusion Models, NLP pipelines, RAG, prompt engineering

Data & ML Engineering: Python, NumPy, Pandas, dataset preprocessing & augmentation, automated data pipelines, SQL, MongoDB

APIs & Dev Tools: FastAPI, Node.js, REST APIs, Git (version control), CI/CD, MongoDB

PROFESSIONAL EXPERIENCE

Software Engineer Intern | [Bluestock Fintech](#)

Feb 2026 – Apr 2026

- Collaborated cross-functionally to deploy scalable backend API features, reducing production issues by 20% through data-driven insights.
- Optimized REST API endpoints for efficient data retrieval; maintained clean version history using Git across a multi-developer team.

Python Programming Intern | [CODTECH IT Solutions Pvt. Ltd.](#)

Jan 2026 – Feb 2026

- Engineered automated data pipelines using Python (NumPy, Pandas) on large-scale datasets, cutting processing latency by 50%.
- Performed rigorous dataset preprocessing and augmentation to achieve production-grade quality for ML-ready analytical tools.

AI/ML PROJECTS

CuroMinds – LLM-Powered Recursive Understanding Engine

- Built an AI system leveraging LLM-based generation (GPT/Transformer architecture) and ML models, improving response relevance by 35%.
- Designed NLP pipelines for intelligent query understanding; integrated MongoDB for async querying, reducing system latency by 30%.

RetailPulse AI – Generative & Predictive Retail Analytics

- Developed a multi-agent AI pipeline (Python + FastAPI) applying ML and generative techniques to forecast demand, boosting efficiency by 35%.
- Applied dataset preprocessing and augmentation strategies to improve predictive model accuracy on historical sales data.

Mandi – AI-Powered Local Business Platform

- Integrated AI recommendation engine analyzing user interaction data, lifting engagement by 25%; backend in Node.js + MongoDB.
- Built data ingestion and processing pipelines handling large unstructured datasets, improving retrieval performance by 30%.

LEADERSHIP & COMMUNICATION

- Vice President, AI Club: Led team of 10 to host technical events on Generative AI — presented LLM architectures, prompt engineering, and Diffusion Models to 100+ students.
- Major Project Lead (2026): Coordinated cross-team sprint goals and stakeholder communication for a production-grade, data-centric AI project.
